

COLLABORATION SYSTEM

- Unlimited simultaneous users.
- WiFi or Ethernet network.
- Sharing any room display.

Solstice enables multiple users to connect simultaneously to a shared display using a range of devices over a WiFi or Ethernet network. With a Solstice-enabled display in the room, any number of users can instantly connect, share and control the display, fostering collaboration and decision-making.

Solstice is available as licensed standalone software, or the Solstice Pod, which offers a turnkey for any meeting space with a display. Solstice is enterprise-ready, providing robust management capabilities and network deployment options.

The Solstice Software

Solstice Software is the perfect BYOD collaboration solution for conference rooms, classrooms, and huddle spaces. The pure-software version of Solstice installs on a standard Windows 7, 8 or 10 PC and enables facilitating efficient wireless collaboration over existing WiFi/Ethernet networks for improved meeting room productivity and ROI.

Highlights of solstice software:

- + Any number of simultaneous users, sharing unlimited content
- + Customizable display layouts
- + iOS mirroring support
- + Support for multi-touch displays
- + Support for displays of any resolution
- + Configurable sharing options, access control, and user modes
- + BTX is an Intel Gold Technology Partner, and can configure NUCs ideally suited for Solstice

The Solstice Pod

The Solstice Pod is a turnkey solution that combines enterprise-class wireless collaboration software with high-performance hardware at an unbeatable price. Like Solstice Software, the Solstice Pod offers a continuous upgrade path for new features and functionality. The Pod also includes built-in wireless access point capability, supporting on and off-network deployments.

Features of the Solstice Pod:

- + iOS mirroring support including iOS 9
- + Synchronous desktop audio streaming
- + Remote configuration via web browser
- + Built-in WAP capability
- + One-click software updates
- + Includes all security, moderation, and configuration features of Solstice software
- + Small form-factor mounts behind flat panels, on projectors, or under tables
- + Dual-network modes support guest and corporate/campus users

The Solstice Enterprise Edition

Solstice Enterprise Edition delivers all of the collaborative power of Solstice with new features designed for the modern enterprise. By taking performance, security, deployability, and manageability to new levels, Solstice Enterprise Edition raises the bar for wireless media streaming on the enterprise network. Solstice Enterprise Edition is available on the Solstice Pod and Solstice Windows Software.

- + Fully customizable Solstice display splash screens
- + Comprehensive third-party integration API
- + Discovery Tags (allows users to filter displays for connection)
- + Quality of Service (QoS) support
- + Over-the-air software updates behind the firewall (Coming Soon)
- + RSS feeds to Solstice displays (Coming Soon)

Solstice Software Maintenance

The first year of Solstice software maintenance is included with purchase of the original Solstice license(s), with extended software maintenance available for purchase after the first year on an annual basis at a cost of 20% of the license price. Alternatively, extended software maintenance beyond the first year can also be purchased up front at the time of the original order.

Solstice software maintenance provides a future-proof upgrade path for access to new features and improvements made available via software updates after the initial purchase date. A current software maintenance plan is required for access to the software updates as well as technical support from our Solstice experts. Mersive releases new features and improvements frequently via software updates, so be sure to keep your Solstice software maintenance plan up to date.

To inquire about the status of your Solstice software maintenance, please contact us.
