BookIT® Room Scheduling Solution

Elegant, cost-effective system directly integrated with MS Exchange™ and Google™ G Suite

This elegant, cost-effective and easy-to-deploy system is designed for scheduling any conference room on a network from a BookIT touch panel located outside a meeting room, your mobile device or computer. Its sleek design fits into any décor and the intuitive interface requires little to no user training. BookIT directly integrates with MS Exchange™, Office 365™ and G Suite™, so no additional server or middleware is needed, simplifying implementation and significantly reducing cost.

System Includes: 7" BookIT PoE touch panel device, a wall mounting system (bracket included), BookIT Room Scheduling Software and power adapter (when PoE is unavailable).

G Suite

At-A-Glance Room Scheduling
Simply identify room status with universal color coding. No need to guess what is happening behind that closed door!

AVAILABLE   **PENDING**   **OCCUPIED**   **ADMIN SETTINGS**

BookIT: Application Features

- **Meeting Room Calendar** Color-coded room status of red, gold and green lets you immediately know the availability of a room. Click on the calendar button to see a list of meetings in the room the sign is assigned to. The list is scrollable so you can see out to the end of the booking period allowed in Exchange or Google.

- **Schedule Meetings** Select "Add", enter your credentials and you can now schedule a meeting in any available room at any available time.

- **Meeting Check-In** If nobody checks into the room within the configured amount of time, the room will automatically release for others to use. This feature can be enabled, disabled or configured at any time by the administrator.

- **Release Meeting** Your meeting's over early? Make the room available for others by simply releasing the room on the BookIT touch panel display. The end to your meeting will automatically be updated for others to see. Only meetings in session can be released from the BookIT display.

- **Extend Meeting** Extend the meeting on the BookIT touch panel display. You can extend the meeting for as long as you need based on the room's availability. Only meetings in session can be extended from the BookIT display.

- **Delete Meeting** It's easy to delete a meeting from your phone, computer or at the BookIT display. Only the meeting organizer can delete a meeting. Only meetings in session can be deleted from the BookIT display.

- **GUI Options** Easily replace the BookIT logo with your own logo. Also choose from different background options.

- **Support** Have a technical issue with a projector or a display? Just touch "Support" and send a predefined message to summon your internal technical support team to the room.

- **Multiple Languages Available**

BookIT: Admin Features

- **Step-by-step setup for Exchange and G Suite**
- **Set master password for Admin Settings access**
- **Enable and disable meeting warnings**
- **Adjust and turn off auto release time**
- **Control ability to book a meeting from the sign**
- **Change BookIT logo on display to your own logo**
- **Change background theme**
- **Configure content and addresses for technical support**
