MaxBlox™ CD-MX915HH

Half D-Sub Hood for MaxBlox MX9 & MX15

| Part Number	List Price
CD-MX915HH	$2.49

Description

Designed to be used exclusively with our MaxBlox 9 pin and 15 pin d-sub connectors. The patent-pending "half-hood" from BTX is perfect for high density applications where side by side mounting of our solderless MaxBlox d-subs are required. The extended slotted tray provides the perfect place to secure the wire with a standard cable tie, for the ultimate strain relief. The CD-MX915HH can be used directly on the back of a device, plate or panel.

To use

- Terminate the wire to MaxBlox connector (sold separately)

- Slide and snap it into the CD-MX915HH hood

- Attach cable tie to slotted tray for strain relief

- When mounting to a device – use the supplied thumbscrews

- When mounting to a plate or panel – use the hex stand-offs supplied with the MaxBlox conector
