Multiport Adapter

Digital AV

that will work is

dongles

USB-C, you will need one of these

For USB Passthrough – with Inogeni at table

Locator at table

Locator at wall

Extended wiring

NOTE: This audio line is unbalanced stereo. Recommend 22 gauge shielded audio cable. For very long runs, convert to balanced.

NOTE: If your Windows laptop has only USB-C, you will need one of these adapters for HDMI and USB-A.

NOTE: MacBook users – you are accustomed to dongles. One that will work is the Apple USB-C Digital AV Multiport Adapter.

This drawing also applies to the Room 70 Dual Gen 1
