Room 55 Single and Inogeni 4KX-PLUS
For USB Passthrough – with Inogeni at table
Line drawing

Cisco Table Microphones

Typical microphones

LAPTOP for Presentation and USB Passthrough

Startech 3-IN-1 MULTIPORT ADAPTER p/n CDP2HDUACP2

NOTE: If your Windows laptop has only USB-C, you will need one of these adapters for HDMI and USB-A

NOTE: MacBook users – you are accustomed to dongles. One that will work is the Apple USB-C Digital AV Multiport Adapter

4KX-PLUS INSTALLATION

THE ADVANTAGE TO PLACING THE INOGENI AT THE TABLE is twofold:
1) It is not necessary to extend USB
2) If more than one computer is used for USB Passthrough, the Lightware or other switcher can also be at the table, simplifying wiring.

NOTE: This audio line is unbalanced stereo. Recommend 22 gauge shielded audio cable. For very long runs, convert to balanced.

NOTE: We recommend FSR Digital Ribbon Cable for long HDMI runs. If narrow conduit is a problem, then traditional UTP extenders can be used.

FSR Digital Ribbon Cable or UTP extenders

Embedded audio

Extended wiring

Located at wall

3.5mm audio cable

Located at table

HDMI
