**4KX-PLUS INSTALLATION**

The advantage to placing the Inogeni at the table is twofold:
1. It is not necessary to extend USB.
2. If more than one computer is used for USB Passsthrough, the Lightware or other switcher can also be at the table, simplifying wiring.

**NOTES**

- If your Windows laptop has only USB-C, you will need one of these adapters for HDMI and USB-A.
- MacBook users – you are accustomed to dongles! One that will work is the Apple USB-C Digital AV Multiport Adapter.
- We recommend FSR Digital Ribbon Cable for long HDMI runs. If narrow conduit is a problem, then traditional UTP extenders can be used.

**COLOR KEY**

- HDMI
- FSR Digital Ribbon Cable
- USB
- Analog audio
- Link-local
- LAN

**ADDENDUM**

- Room Kit Plus
- Inogeni 4KX-PLUS
