Mounting bracket
User manual
Intro

This bracket can be mounted on top or bottom of monitor. For monitors mounted more than 1100 mm above ground, mount bracket below monitor.
Measurements

Maximum thickness of screen 62 mm, minimum 10 mm. Minimum depth from front of screen to wall is 78 mm.
1. Set depth
Choose the configuration that fits your screen
2. Mount camera

Mount camera to the bracket. Gently tighten and align.
3. Fix bracket to monitor

Tighten clamp to grip the screen securely
4. Connect
Connect the USB Cable
5. Adjust

Adjust camera or bracket angle if needed
6a. Lock

Secure camera with Kensington lock (optional). The lock prevents the camera to be detached from bracket.
6b. Lock

For smaller Kensington locks, use the included washer to secure the camera.
