## HUDDLY: Core Products

# Huddly IQ Smarter video. Better meetings.

Huddly products are flexible, inclusive, easy-to-use and software-upgradable. Whereas most tech gets old fast, Huddly products stay new, evolving over time via the Huddly Vision software platform with new software feature upgrades to support changing team dynamics and needs.

### Huddly IQ | The Intelligent Collaboration Camera.

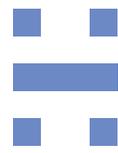

**Huddly IQ** delivers a video meeting experience like no other, with 150° wide-angle video, an embedded microphone array and groundbreaking AI capabilities. An onboard neural engine allows IQ to see, understand and respond to its environment. The genius framing IQ can detect the people in its 150° wide-angle field of view and respond by automatically framing them. And IQ gives organizations crucial insights into how their meeting spaces are being used.

### Huddly GO | Small Camera, Big Experience.

**Huddly GO** is a compact, ultra-wide angle, software-defined collaboration camera that improves over time with each upgrade to the embedded Huddly Vision software platform. Huddly GO is USB 3 powered and platform agnostic, with a small form factor that makes GO perfect for multiple scenarios including huddle rooms, open collaborative environments, laptops and more.
